PROFILE

AI Engineer and Python Backend Developer with hands-on experience building AI agents, LLM-powered applications, and backend systems using Python, FastAPI, LangGraph, and Model Context Protocol (MCP). Experienced in developing conversational AI, intelligent automation workflows, and scalable APIs. Passionate about building production-ready AI applications that solve real-world problems

PROFESSIONAL EXPERIENCE

- AI Engineering Intern, Codely AI**01/2026 – 07/2026
Kozhikode
 - Built AI-powered applications and backend services using Python and FastAPI.
 - Developed AI agents, multilingual voice applications, and LLM-powered workflows using prompt engineering and tool calling. Built MCP-based repository analysis tools and event-driven AI agent workflows.
 - Implemented LLM evaluation using DeepEval and OpenEvals to improve AI response quality.
- Junior Data Scientist Intern, Codeme Hub International**06/2025 – 08/2025
Kozhikode
 - Analyzed and visualized business data using Power BI, Excel, and Python.
 - Delivered actionable insights through data analysis and SQL.

EDUCATION

- Bachelor of Technology in Computer Science, KTU**11/2022 – 05/2026
Kozhikode

PROJECTS

- AI Voice Hotel Booking Agent**
 - Built an AI-powered multilingual voice calling agent using Speech-to-Text (STT), Large Language Models (LLMs), and Text-to-Speech (TTS), integrating Retrieval-Augmented Generation (RAG) for hotel search and policy retrieval.
 - Implemented prompt engineering, conversation memory, function/tool calling, and structured workflows for booking, human call transfer, and interruption handling.
 - Optimized voice interactions with Voice Activity Detection (VAD) to enable responsive, natural, and low-latency conversations.
- LoopFlow – Event-Driven AI Agent Platform**
 - Developed an event-driven AI agent platform using Loop Engineering with verification loops.
 - Built a Streamlit dashboard for workflow monitoring and automated execution.
- CareCircle – Smart Health Monitoring & Fall Detection System**
 - Developed an IoT-based health monitoring system using ESP32, FastAPI, PostgreSQL, and Flutter.
 - Implemented real-time monitoring, emergency alerts, and live location tracking.
- MultiMode AI – Multi-Mode Conversational Assistant**
 - Built a conversational AI system using LangGraph, LangChain, Gemini API, and RAG.
 - Developed a FastAPI backend with document upload, semantic search, and AI tools.

CERTIFICATES

- | | | | |
|--|--|---|---|
| Python Developer 
Sololearn Issued Mar 2025 | PowerBI With Excel
CodeMe Hub Issued July 2025 | FastAPI 
CodeSignal Issued Sept 2025 | Data analytics 
Deloitte Issued Aug 2025 |
|--|--|---|---|

SKILLS

- Soft Skills:** Collaboration | Communication | Problem Solving | Continuous Learning
- Technical Skills:** Programming Languages: Python, SQL, C | AI & Agent Frameworks: AI Agents, LangGraph, LangChain, Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG), Prompt Engineering | LLM Technologies: Large Language Models (LLMs), DeepEval, OpenEvals, FAISS, Hugging Face Transformers | Backend Development: FastAPI, Flask, PostgreSQL, REST API Development | AI Platforms: Gemini API, Groq API, OpenRouter | Developer Tools: Docker, Git, GitHub

ORGANISATIONS

- National Service Scheme (NSS), Volunteer**11/2023 – 05/2026
Contributed to community service initiatives, awareness campaigns, and outreach activities as an NSS volunteer.
- Kozhikode, Kerala, India
