SUMMARY

Passionate and analytical **Data Analyst** with hands-on experience in **Data Analytics**, **Data Science**, **Machine Learning**, **Business Intelligence**, and **Statistical Analysis** through academic projects and practical implementations. Experienced in transforming complex datasets into actionable business insights using **Python**, **SQL**, **Power BI**, **Tableau**, **Excel**, and modern data visualization techniques. Strong foundation in **Exploratory Data Analysis (EDA)**, **Data Preprocessing**, **Feature Engineering**, **Predictive Modeling**, **Time Series Forecasting**, and **Machine Learning** while applying **Problem Solving**, **Statistical Analysis**, and **Business Analysis** methodologies to support data-driven decision-making.

Skilled in developing predictive models, recommendation systems, interactive dashboards, and business reports using **Pandas**, **NumPy**, **Scikit-learn**, **Power BI**, and **SQL**. Passionate about **Artificial Intelligence**, **Business Intelligence**, **Data Visualization**, **Model Evaluation**, and delivering scalable analytics solutions that help organizations improve operational efficiency and strategic decision-making.

SKILLS

Data Analytics & Business Intelligence

Data Analytics, Business Intelligence, Business Analysis, Data Visualization, Dashboard Development, Report Automation, KPI Analysis, Data Interpretation, Business Reporting, Decision Support

Data Science & Machine Learning

Machine Learning, Predictive Modeling, Statistical Analysis, Exploratory Data Analysis (EDA), Data Preprocessing, Feature Engineering, Model Evaluation, Regression, Classification, Clustering, Recommendation Systems

Data Management

SQL, Database Management, Data Cleaning, Data Transformation, Data Validation, Data Modeling, Data Quality, Data Integration, Data Mining

Business Analysis

Requirement Analysis, Business Process Analysis, Trend Analysis, Forecasting, Data-Driven Decision Making, Problem Solving, Stakeholder Communication, Documentation

AI & Emerging Technologies

Artificial Intelligence, Machine Learning, Time Series Forecasting, Recommendation Systems, Prompt Engineering, AI Fundamentals

Professional Skills

Analytical Thinking, Communication, Problem Solving, Critical Thinking, Attention to Detail, Team Collaboration, Time Management, Continuous Learning

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java

Data Analytics & Machine Learning: Pandas, NumPy, Scikit-learn, TensorFlow (Basics)

Data Visualization & Business Intelligence: Power BI, Tableau, Microsoft Excel, Matplotlib, Seaborn

Databases: MySQL, MongoDB

Statistical & Analytics Tools: SPSS Statistics

Development & Collaboration Tools: Git, GitHub, Jupyter Notebook, BlueSky

PROJECT

Demand Forecasting System Using Time Series Analysis

Python | ARIMA | Prophet | Pandas | Matplotlib

- **Developed** an end-to-end **Demand Forecasting System** using **ARIMA** and **Prophet** models to predict future sales trends and support inventory planning.
- **Performed** comprehensive **Time Series Analysis** to identify trends, seasonality, and anomalies within historical sales datasets.
- **Conducted Data Preprocessing**, feature engineering, and creation of lag variables and rolling averages to improve forecasting performance.
- **Evaluated** forecasting models using **MAE** and **RMSE** metrics while optimizing model parameters for improved prediction accuracy.
- **Visualized** forecasting outputs and business insights using **Matplotlib** to support data-driven decision-making.
- **Applied** statistical analysis techniques to enhance demand planning and business forecasting capabilities.
- **Documented** project methodology, model evaluation process, and forecasting results for future enhancements.

AI-Powered IPL Auction Analysis & Prediction System

Python | Scikit-learn | Pandas | Matplotlib | Seaborn

- **Performed Exploratory Data Analysis (EDA)** on historical IPL auction datasets to identify player valuation trends and team spending patterns.
- **Conducted Data Preprocessing**, feature engineering, and dataset transformation to prepare data for predictive modeling.
- **Developed** supervised **Machine Learning** regression models using **Scikit-learn** to estimate player auction values.
- **Evaluated** model performance using statistical metrics and iterative parameter optimization techniques.
- **Created** insightful visualizations using **Matplotlib** and **Seaborn** to communicate business findings effectively.
- **Applied** statistical techniques and predictive analytics to improve auction value estimation.
- **Documented** project architecture, analytical methodology, and model evaluation results.

BeatBuff – AI-Based Music Recommendation System

Python | Machine Learning | Recommendation Systems

- **Developed** an AI-based music recommendation system using similarity-based recommendation algorithms.
- **Processed** and analyzed music datasets to generate personalized recommendations based on user preferences.
- **Applied** recommendation algorithms to improve recommendation accuracy and user experience.
- **Optimized** recommendation quality through iterative model tuning and evaluation.
- **Visualized** user behavior and recommendation insights to improve model performance.
- **Implemented** data preprocessing techniques to prepare datasets for recommendation analysis.
- **Documented** recommendation methodology, model improvements, and project outcomes.

EDUCATION

Master of Computer Applications (MCA)

LEAD College (Autonomous), Palakkad • Kerala, India

Bachelor of Computer Applications (BCA)

College of Applied Science, Calicut • Kerala, India • 2024

CERTIFICATIONS

Python for Data Science, AI & Development – IBM

Tools for Data Science – IBM

Data Science Methodology – IBM

What is Data Science? – IBM

J.P. Morgan – Quantitative Research Job Simulation – Forage

ACHIEVEMENTS

Developed multiple end-to-end Machine Learning and Data Analytics projects focused on predictive modeling, recommendation systems, and business forecasting.

Applied Time Series Forecasting techniques using ARIMA and Prophet to support data-driven inventory planning.

Designed interactive data visualizations and business dashboards using Power BI, Tableau, and Python visualization libraries.

Completed multiple globally recognized IBM Data Science certifications, strengthening practical knowledge of analytics, AI, and machine learning workflows.

Successfully completed the J.P. Morgan Quantitative Research Job Simulation, gaining exposure to financial data analysis and quantitative research methodologies.
